Pinkz Public Matriculation Higher Secondary School, Kasthambadi

1st April'2017 @ 5.30pm

Pinkz Public School across the Tiruvannamalai District have been the perfect epitome of quality schools where talent is nurtured and the latent talent is given the ample exposure so that it can be sharpened. We, the PINKZ have always been emulating the glorious tradition of producing quantity and quality results. Moreover we have been at the forefront to instill our students with basic human values. Today the perception is very clear that the perfect ambience for the function is unprecedented here in this open auditorium. I take this electrifying moment as a wonderful opportunity to read out the School's Annual Report for the session 2016 -17.

I feel very delighted to give you a sense of how very sincerely teaching and learning processes take place in the PPS. This is very well vindicated by the results our school produced last year in the Board Examinations of Class X and XII. We produced 100 percent results in X and XII. But, the honorable guests and dear parents, the story of brilliance does not end here. Received its first ever such honor from Parents of Tiruvannamalai District for giving outstanding results. This is indeed a great feather in the marvelous cap of PPS. We have promised to ourselves to write this success story further with even more impressive and remarkable results.

OLYMPIAD EXAMINATION:

These days, with the competition at the post-school level getting tougher, it becomes necessary for the school students to be prepared emotionally and mentally to tackle the challenges coming their way. Olympiads are a great help in this preparation. Organized for students of class 1st to 12th, these Olympiads test a student's aptitude as well as the knowledge of a particular subject. Olympiads, though challenging, are very important for a student's growth; here's why:

True test of concepts

Olympiads are known for presenting questions that test a student's conceptual understanding of the subject. Apart from the basic concepts, it makes them use their logical reasoning skills, which exams at the school level don't do. It tests a student's problem solving ability and challenges them to think analytically.

Prepares them for future competitive exams

Olympiads don't go easy on the students, which is why the results acquired are more exact. The level of difficulty of Olympiads is very close to the various competitive exams students appear for after their 12th grade. A student who is aware of the kind of questions that Olympiads present does not lose confidence while appearing for different competitive exams, later on.

Opportunity to shine

Appearing for Olympiads gives students an opportunity to compete with students of their age from not just the school, but all over the country. It not only gives them the required exposure, but also provides them the opportunity to represent their schools at state, national and international levels.

Motivates them to work harder

Since Olympiads are very different from school examinations, they are able to pique the interest and curiosity of the students. The varying levels of difficulty are taken up as challenges by the students and they feel driven to do the best of their ability. They begin to work harder to be able to compete better and improve their results.

Improves performance in school

Although the school curriculums concentrate on the syllabus and are not challenging enough in their approach, Olympiads do sharpen the skills of students. As a student begins to be more logical and uses reasoning, he/she is able to grasp the concepts taught in schools better too. This obviously has an appreciable effect on their performance and grades.

And honestly, there are no demerits of participating in an Olympiad Examination. Olympiads are just stepping stones to success and nothing more than another challenge in a student's path and our achievements as follows

Extra Curricular Activism:

Apart from academics our school organizes co curricular activities every Saturday .These EC activities in the form of various competitions provide an essential platform to our students where they hone their skills .These EC activities prevent the class room teaching and learning from being monotonous.

Drawing Competition:

Children can't always express themselves using words and actions, So Drawing is another important form of communication. You can gain an insight into your child's thoughts and feelings through their drawings Being able to express what they feel also boosts a child's emotional intelligence. Elangumaran from Grade @ A got III prize at district level Drawing Competetion.

Kung Fu Competition:

Martial arts training is interactive and friendships are built through the many hours of training together, so our classes are a great way to meet new people and make new friends. Every child needs to have some form of discipline and this can be found in all of our classes.

Our philosophy with our children's classes is to make their learning experience fun, but with an understanding of the importance of good manners, respect for themselves and others and achievement through hard work. We believe our classes instill many positive attributes and help our children understand that through their own hard work and commitment they can achieve great things.

PINKZ PROFICIENCY:

Our Children has done a Marvelous improvement. It's too hard for us to choose best among best in academic activism. The following children were awarded proficiency award.

PINKZ PROFICIENCY 2016-17

Infrastructure in any institution is supposed to be the one of the most significant ingredients for its smooth and successful functioning. Our management has taken the great effort to furnish the furniture at sufficient level in all class room. As the building construction work is finished completely at need of children in our school.

CHILDREN PARLIAMENT:

Children Parliament teaches democracy and citizenry skills to students while giving them an official forum to voice their own concerns and solutions to local and global issues. The aim of the project is to inform youth about political processes and get them involved in their schools and communities. Students learn how decisions are made and are also responsible for making some decisions themselves. Through the Children's Parliament program, students organize a variety of social and educational activities in their schools such as health and fitness events, environmental activities or multicultural events.

Children Parliament: 2016-17

No	Name	Class	Post
	COUNCIL

5	Rushikesh	XI	Sports Minister
6	Sailesh Kumar	XI	Food & Health Minister
7	Rithi	XI	Environmental Minister
8	Yamuna Shree	XII	Art &Cultural Minister

RED CROSS:

RED CROSS is one of the prominent features of the PPS. It fills the students with various qualities like punctuality, cleanliness, discipline, patriotism and the other philanthropic traits.

SCIENCE FAIR:

PPS conducts various exhibitions at school, levels. Our school participated in the Science Exhibition at district level in which six students represented our PPS.

PTA:

Interaction between teachers and parents is the need of the hour so that these two forces can cause a huge welcome change in the children .That's why Parents Teacher's Association is organized from time to time .This helps us monitor the progress of the students at school and at home. I am reminded of a well said line which says "Alone I can't walk properly, but together we can run fast surely".

Last but by no means least I would like to throw light on CCE (Continuous Comprehensive Evaluation). This CCE system has proven to be a big bonanza for the students as there is "No Failure Policy" till class VIII. It comprises of grading system which makes the examination system easy and wide .The students are evaluated not only on the basis of written exams but

also on the basis of other activities that are held under FA II and FA IV. This grading system has given an absolute freedom to the students to showcase their extracurricular skills.

I am sure when the Annual School Report would be read to you next year, that would comprise many more other achievements which shall make us proud.

Thank You!!!!

I.John Marlin Inbakumar

Principal
