

**Topic: TOUCH SCREEN****DATE:** 18-12-18**DAY:** TUESDAY**NAME OF THE TRAINER:** Mr.Ganesh**TIME:** 4:00pm to 5:00pm

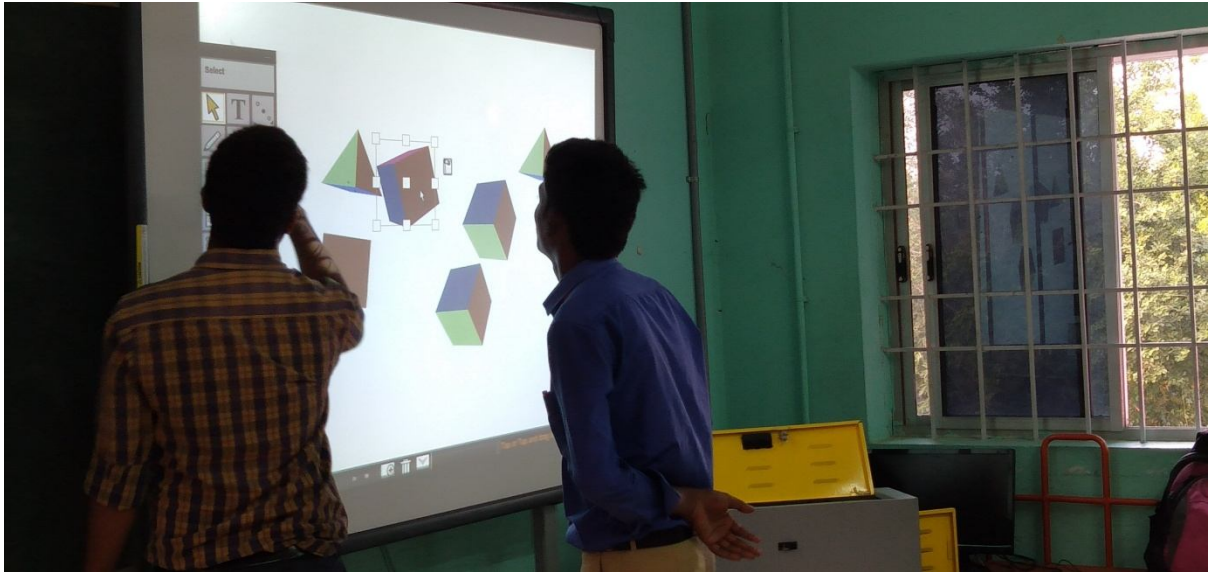

Mr. Ganesh visited our school around 3:45pm. He met our Principal, and went to the classroom along with the Mrs. Sindhu-Coordinator. The teachers handling Pre-k to Grade V, attended the meeting. Around 4:00pm all the teachers assembled in the Demo room.

He started to give the Demo about the TOUCH SCREEN. All the contents were the same, but the hardware to be used was new to the teachers. He opened the necessary page and explained the teachers how to use the new hardware. As the teachers were already familiar with the content part, they were able to understand the hardware part too very easily.

He explained that all the hardware parts will be wall mounted later. So the classroom will look neat and good. Even the big white board, TOUCHSCREEN also will be wall mounted. The teachers can use a stylus to operate the touch screen instead of touching it with finger tips.

He also made our Maths teacher Mr. Renu Gopal to do a demo by using the touch screen. Then Mr.Ganesh, opened the NEXTTOOLS, and explained the teachers in detail how to use it. He also showed the teachers how to use the animated videos, how to take a snapshot, how to enlarge the image, etc.

He also said that, evolution of technology has a massive impact on the human race. The impact of technology on education plays a vital role in realm of everyday life. Technology has always been in schools. The development of things likes the overhead projector, typewriter, and blackboards have all played key roles in education. And now it is the time for us to move one step ahead by using these touch screen in the classrooms.

The session came to an end with a feedback, by Ms. Vaithegi. Mr. Ganesh finally had an interaction with Mrs. Chitra Adl. Correspondent and Principal, Mr. John Marlin Inbakumar.
